

Red area is the spine.
Lines on each side is the score
lines that sits 5 mm from spine.

It is not recommended to print on
the spine or the fold lines as most
printer toners will smudge from the
heat applied when binding.

Height 297 mm

1.5 mm spine = 424 mm

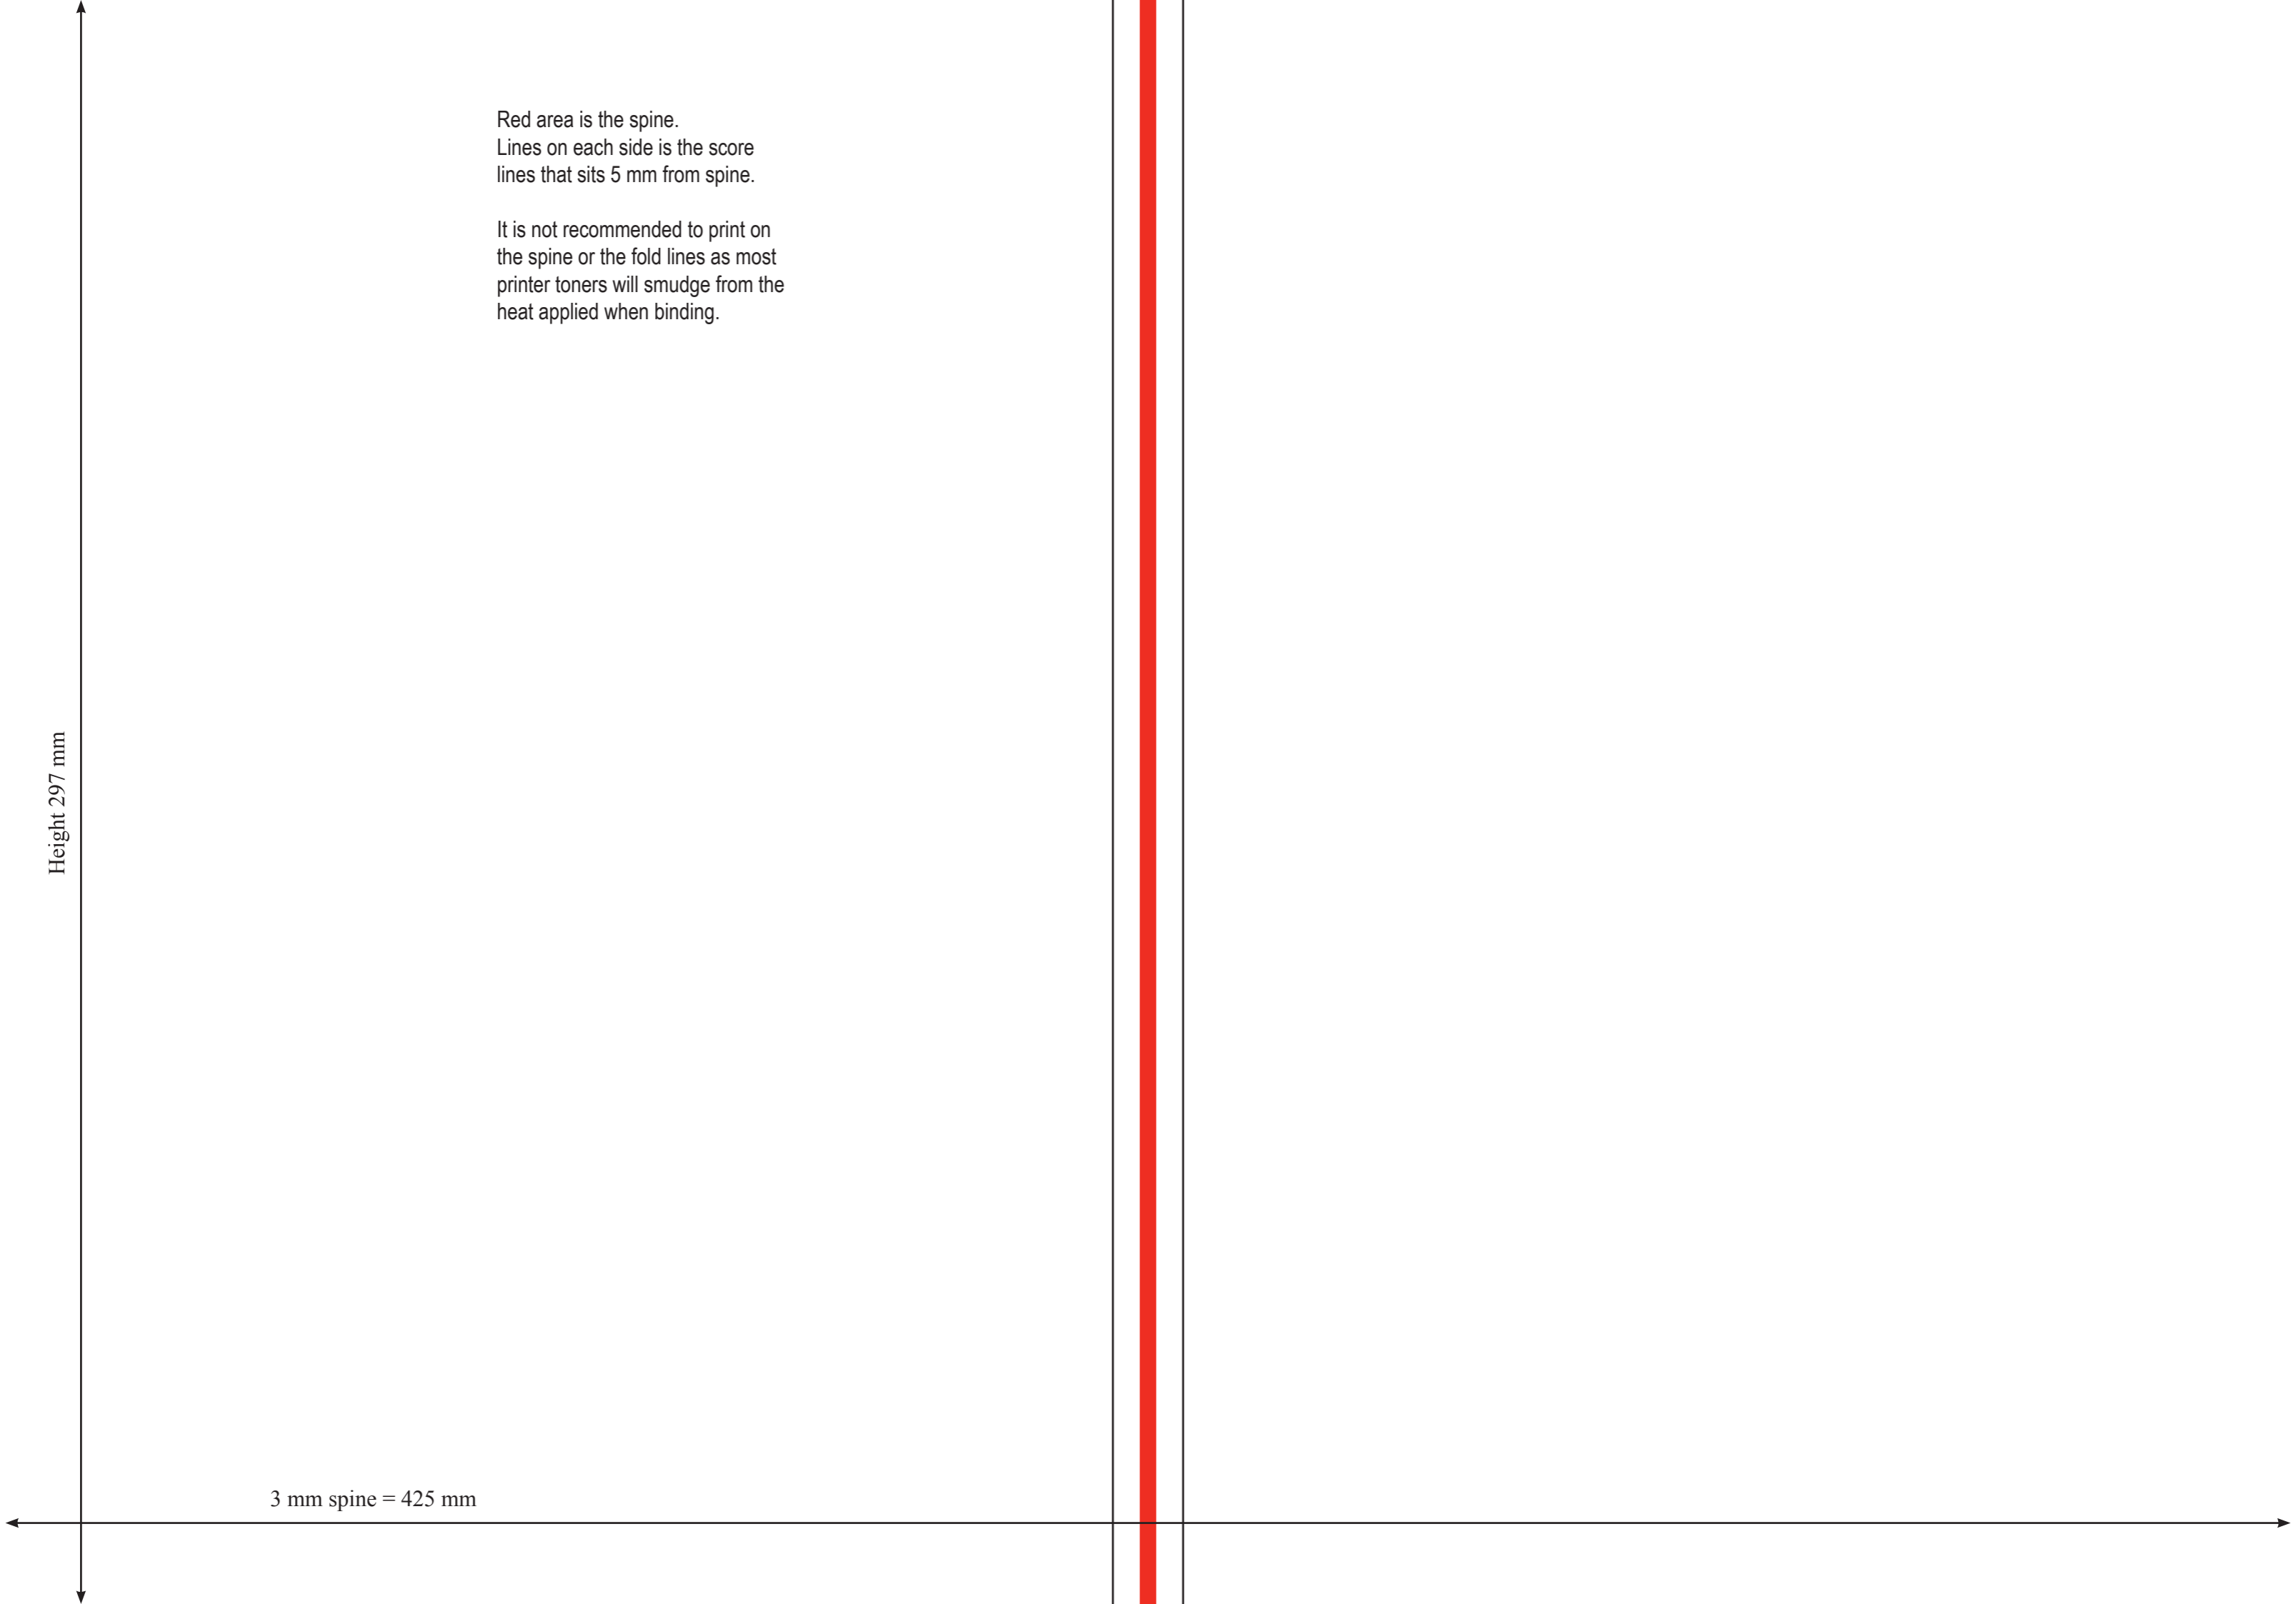

Red area is the spine.
Lines on each side is the score
lines that sits 5 mm from spine.

It is not recommended to print on
the spine or the fold lines as most
printer toners will smudge from the
heat applied when binding.

Height 297 mm

3 mm spine = 425 mm

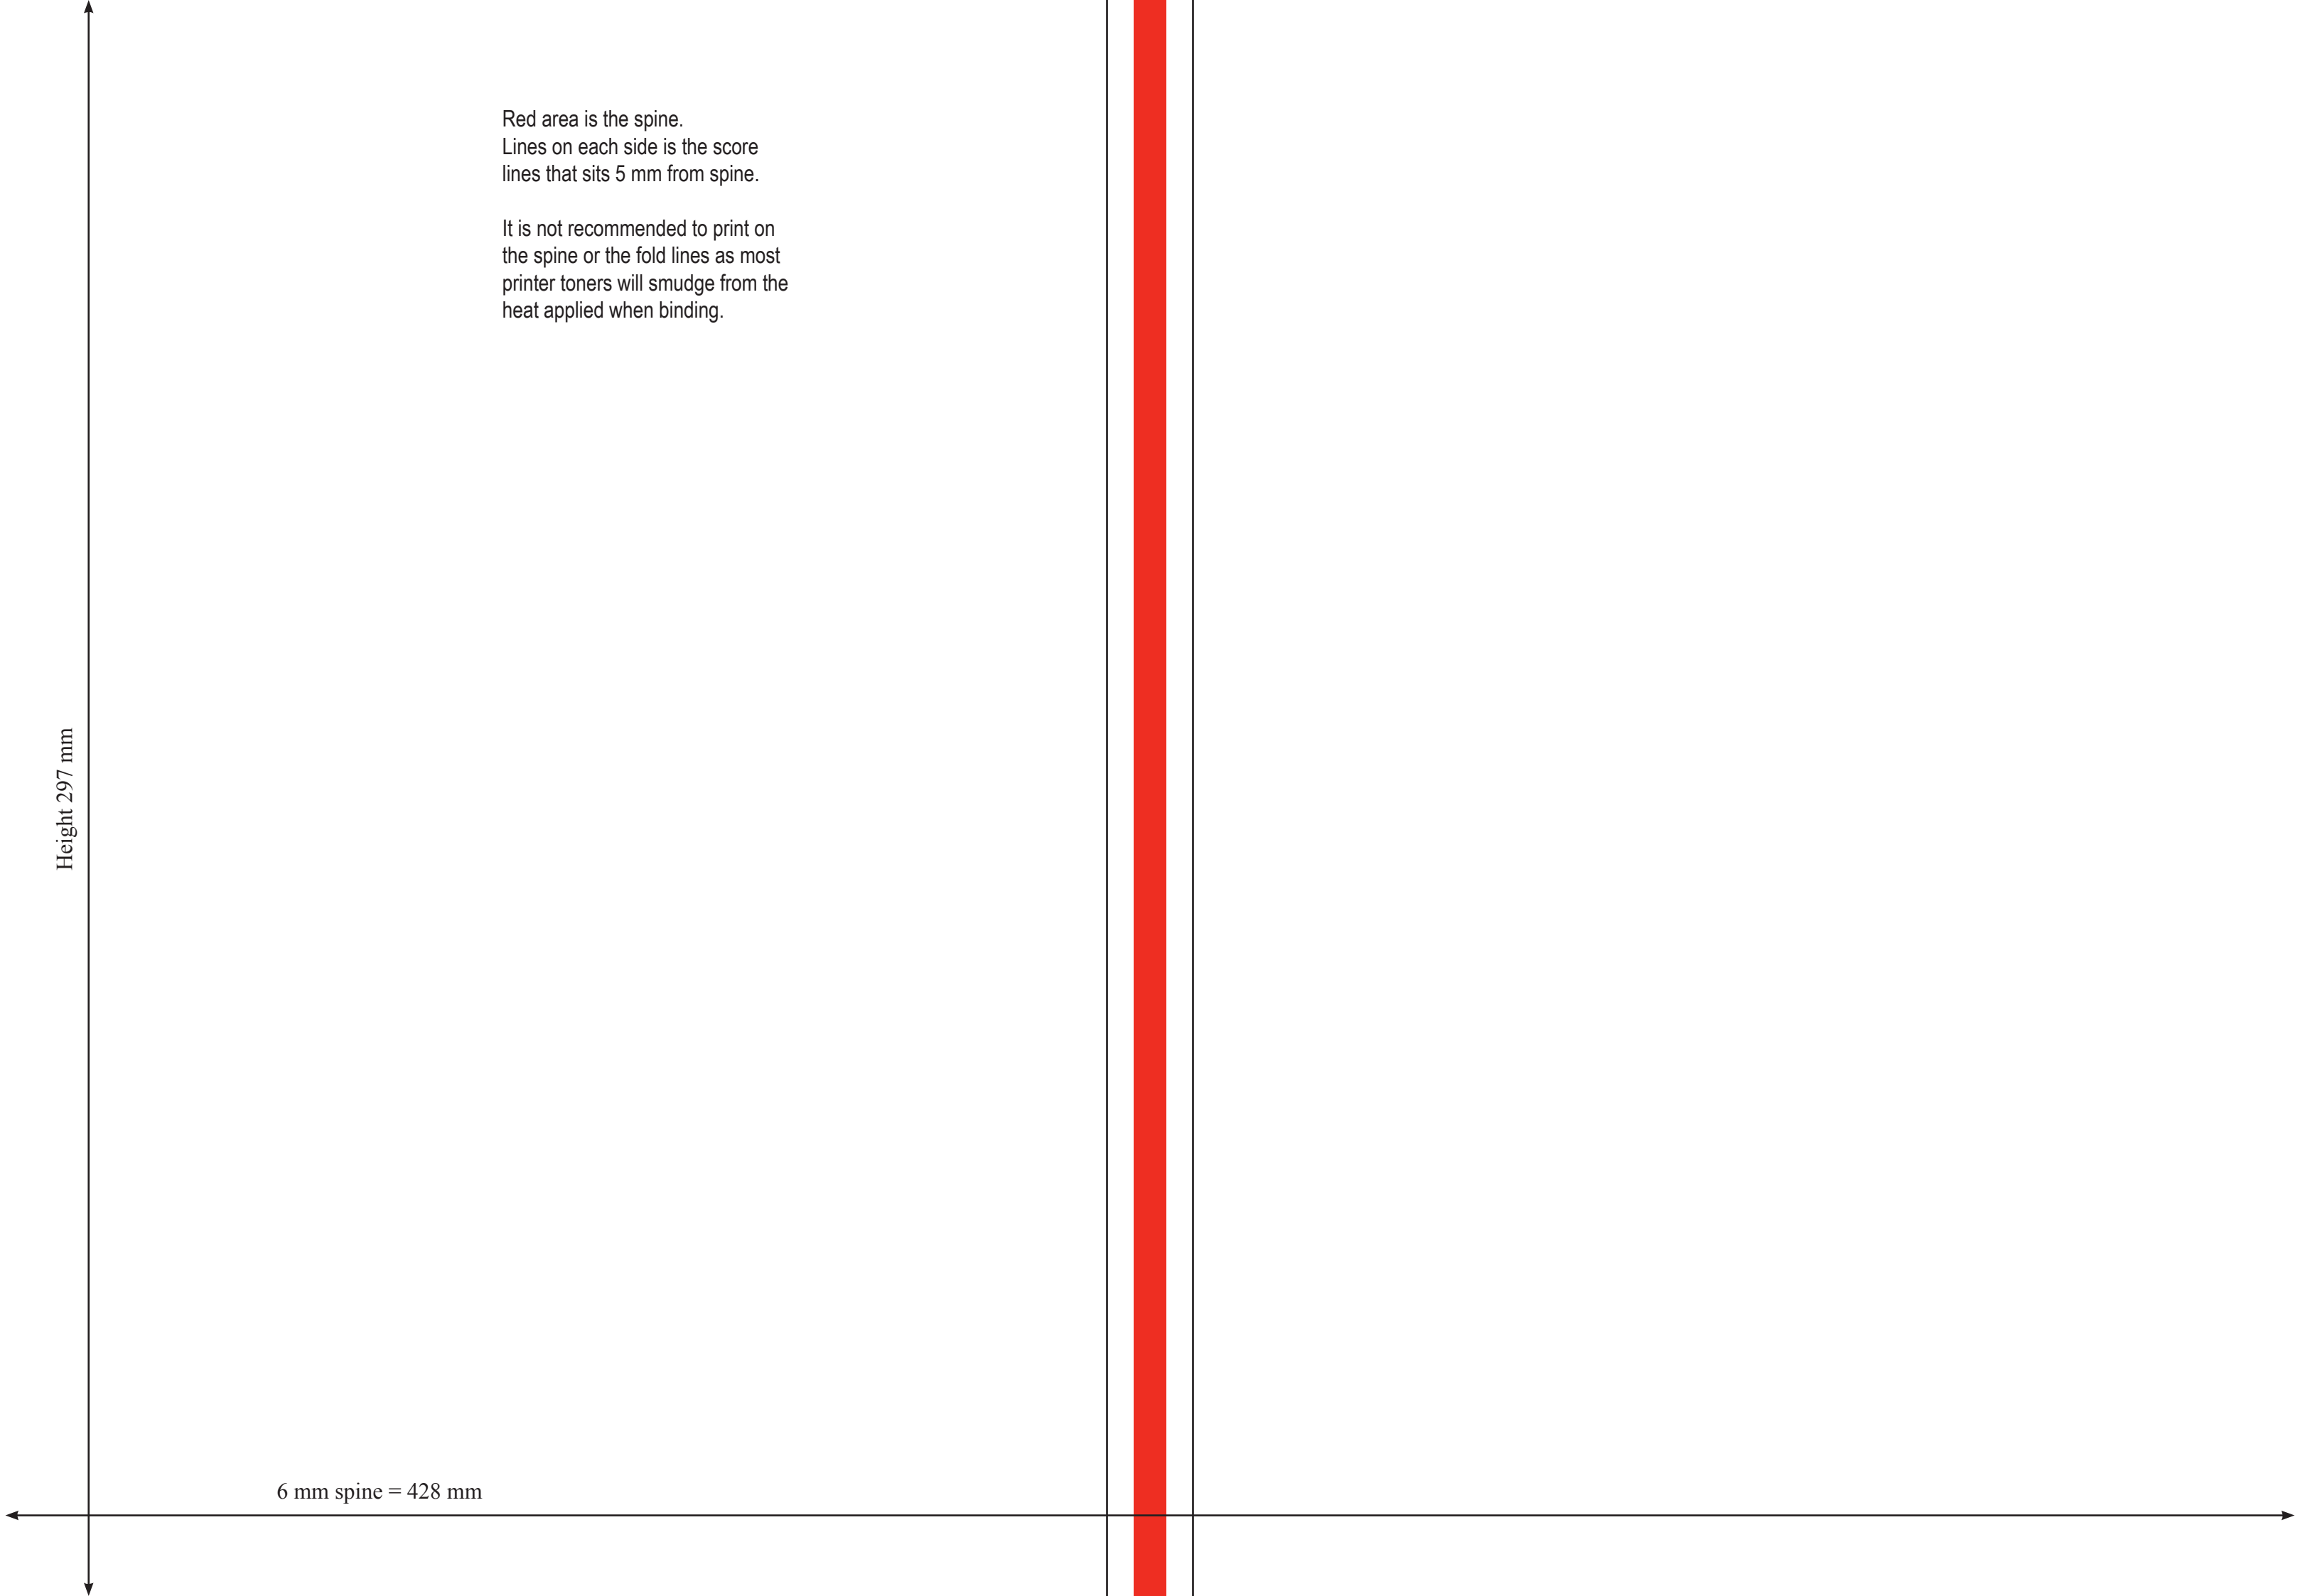

Red area is the spine.
Lines on each side is the score
lines that sits 5 mm from spine.

It is not recommended to print on
the spine or the fold lines as most
printer toners will smudge from the
heat applied when binding.

Height 297 mm

6 mm spine = 428 mm

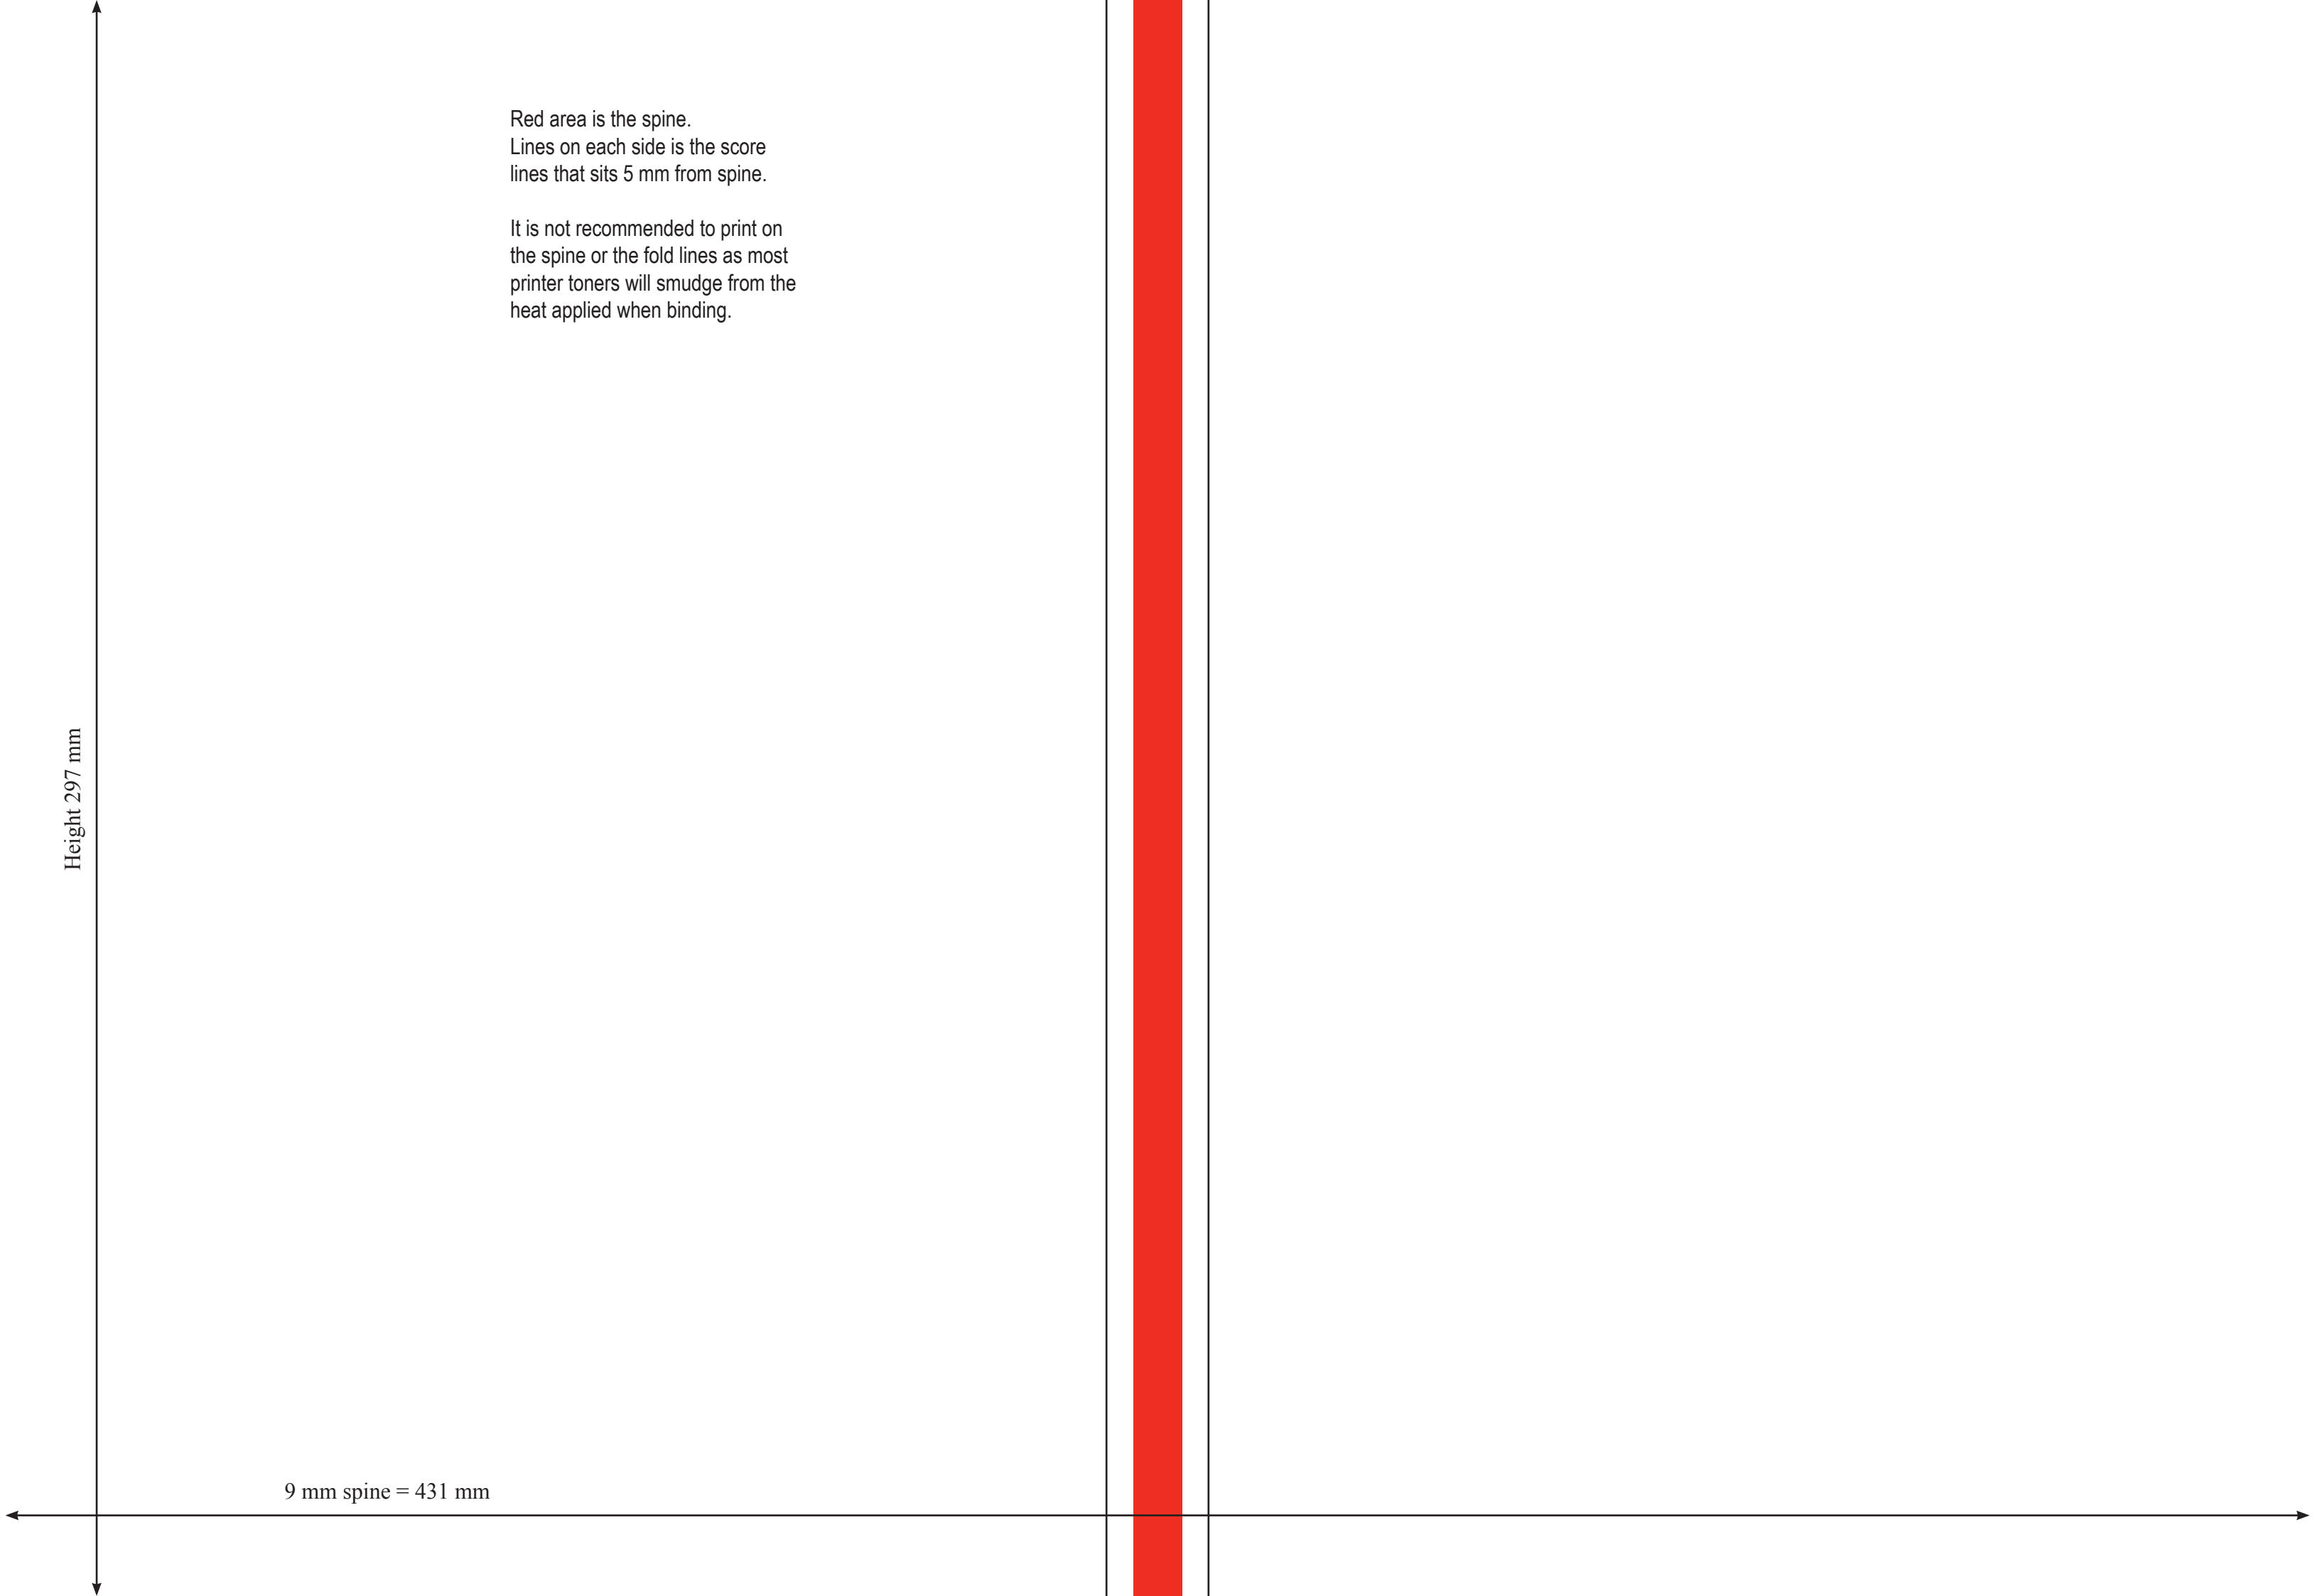

Red area is the spine.
Lines on each side is the score
lines that sits 5 mm from spine.

It is not recommended to print on
the spine or the fold lines as most
printer toners will smudge from the
heat applied when binding.

Height 297 mm

9 mm spine = 431 mm

Red area is the spine.
Lines on each side is the score
lines that sits 5 mm from spine.

It is not recommended to print on
the spine or the fold lines as most
printer toners will smudge from the
heat applied when binding.
